

AMAJOINER 20

Stand alone Aggregation to Shipping Cases & Pallets

Highlights

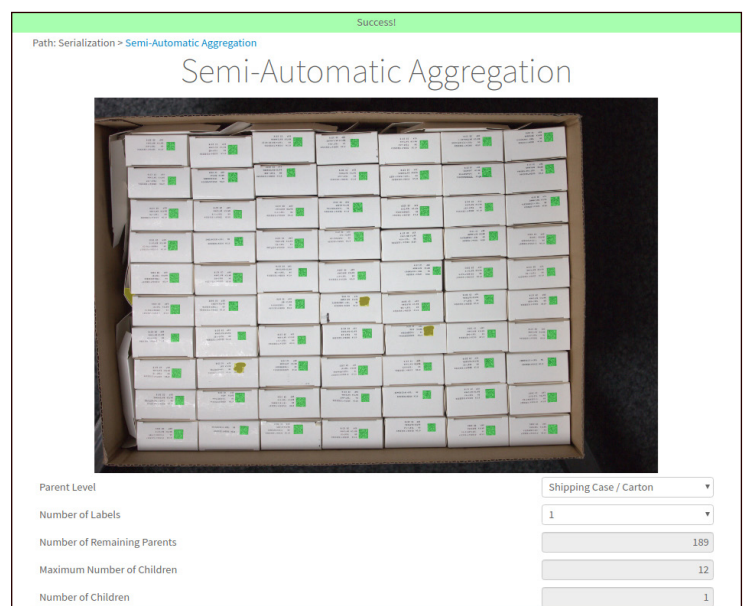

- Throughput up to 30 shipping cases/Minute due to **optimized Workflow**
- Integrated **solution allowing standalone operation** e.g. warehouse. The machine includes an integrated end to end IT-System (from coding line up to data exchange)
- Unrivaled **low investment cost** plus short delivery time
- **Easy operation** -> No experts required

System

Hicof combines the aggregation station with a comprehensive corporate, easy to operate, **GxP compliant database** to **allow the stand-alone operation**. This makes complex and expensive multilevel IT systems with multiple interfaces and data integrity issues obsolete.

The aggregation station Amajoiner can be directly connected to the coding line Hicof Amacoder or be used as stand-alone solution. The line allows to aggregate folding boxes to shipping cases by using an overhead high resolution multicode camera with adjustable focus for scanning multiple packaging layers. Thereby, the Amajoiner covers a wide variety of shipping case sizes up to 600x400x400mm. Further the machine can aggregate shipping cases to pallets.

Due to its simple mechanical design and use of groundbreaking IT technologies as e.g. cloud computing the Amajoiner offers unrivaled **low investment cost** as well as short delivery times.

AMAJOINER 20

Stand alone Aggregation to Shipping Cases & Pallets

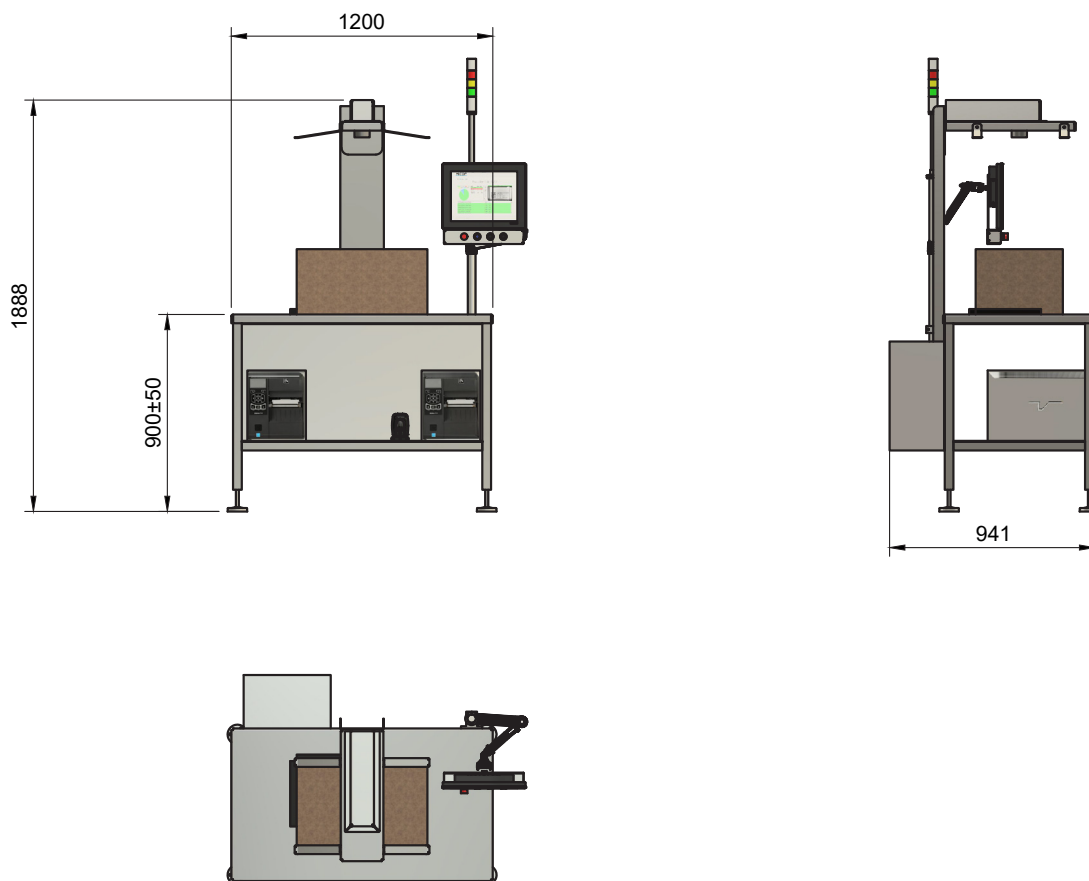

Technical specifications Amajoiner

Size: Width 1200mm, Depth 941 mm, Height 1888mm (customization possible)

Equipment:

- High End Vision System
- 20 MP Camera with LED illumination
- Autofocus
- Label printer for shipping case label
- Hand scanner

Dimensions

Implementation Support

Hicof AG offers documentation & support for validation/ qualification (IQ-OQ-FAT-SAT) and training in form of standard packages. Additional support regarding business processes, legal requirements and barcode technologies offers our mother company Vesdo AG.
